

AWS Certified Cloud Practitioner

Practice Questions — Q1 to Q65

Q1. A customer currently has a Basic support plan and is planning to use the Infrastructure Event Management, Well-Architected Reviews, and Operations Reviews features in AWS. What action should be taken to access these features in the most cost-effective manner?

A	Upgrade to the Enterprise support plan. ✓
B	None since these features are already included in their Basic support plan.
C	Upgrade to Business support+ plan.
D	Upgrade to Unified Operations plan.

Q2. A customer is planning to migrate some of their web applications that are hosted on-premises to AWS. Which of the following is a benefit of using AWS over virtualized data centers?

A	Lower variable costs and lower upfront costs. ✓
B	Higher variable costs and higher upfront costs.
C	Higher variable costs and lower upfront costs.
D	Lower variable costs and higher upfront costs.

Q3. What service provides the lowest-cost storage option for retaining database backups, which also allows occasional data retrieval in minutes, and can be used with Lifecycle policies to automatically move backups to the most cost-effective tier?

A	Amazon S3 Glacier Flexible Retrieval ✓
B	Amazon EBS
C	Amazon S3
D	Amazon EFS

Q4. Which of the following is the most cost-effective AWS Support Plan that provides access to the AWS Support API for programmatic case management?

A	Business Support+ ✓
B	Enterprise
C	Basic
D	Unified Operations

Q5. A company that has a basic support plan needs resources to deploy, test, and improve its AWS environment. The company is also considering upgrading to AWS Enterprise Support in the future. Which of the following can the company use for free?

A	AWS online documentation, whitepapers, blogs and support forums ✓
B	In-person classes with an accredited AWS instructor
C	AWS Support API for programmatic case management
D	Technical Account Manager consultation

Q6. Which of the following is a key use case of AWS Control Tower?

A	An easy way to establish a landing zone that implements an AWS well-architected, multi-account environment and applies the AWS best practices. ✓
B	A way for customers to send instructions to an AWS account on how to deploy popular technologies such as WordPress.
C	A centralized logging service for all types of log files.
D	A fast monitoring engine used to detect if any of your AWS accounts deviate from the AWS best practices.

Q7. A startup is developing a mobile app with a database service to store user data. The app is expected to grow rapidly, and the company needs a flexible and scalable database service that can handle unpredictable traffic and workload spikes. Which service should the startup use if they need a scalable, fast, and flexible non-relational database service?

A	Amazon Redshift
B	Amazon S3
C	Amazon RDS
D	Amazon DynamoDB ✓

Q8. How can you apply and easily manage the common access permissions to a large number of IAM users in AWS?

A	Attach the exact same IAM Policy to all of the IAM Users.
B	Apply permissions to multiple IAM Users by using a cross-account role.
C	Attach the necessary policies or permissions required to a new IAM Group then afterwards, add the IAM Users to the IAM group. ✓
D	Attach the IAM Policy to an IAM Role then afterwards, associate that role to all of the IAM Users.

Q9. Which of the following allows you to categorize and track your AWS costs on a detailed level?

A	Cost allocation tags ✓
B	AWS Budgets
C	Consolidated Billing
D	AWS Billing Conductor

Q10. A customer needs to establish a dedicated connection between an on-premises network and an AWS VPC that provides a more consistent network experience than Internet-based connections. Which of the following network services should the customer use?

A	AWS Direct Connect ✓
B	AWS VPN CloudHub
C	AWS Client VPN
D	VPN Connection

Q11. Which of the following AWS services provides managed compliance and security controls for workloads and ingests findings from AWS Systems Manager Patch Manager and other sources?

A	AWS Security Hub ✓
B	Amazon EC2
C	Amazon S3
D	AWS Lambda

Q12. Which service does AWS use to notify customers when AWS is experiencing events that may have an impact on AWS resources?

A	AWS Health ✓
B	Amazon CloudWatch
C	Amazon Simple Email Service (Amazon SES)
D	Amazon Simple Notification Service (Amazon SNS)

Q13. Which of the following is true regarding the Business Support+ plan in AWS?

A	Provides a 15-minute response time support if your business-critical system goes down
B	Provides a 1-hour response time support if your production system goes down ✓
C	Provides a 15-minute response time support if your production system goes down
D	Provides a 1-hour response time support if your production system got impaired

Q14. In AWS, which of the following is a design principle that you should implement when designing your cloud architecture?

A	Tightly couple your components
B	Always use large servers to anticipate increase usage
C	Use multiple Availability Zones ✓
D	Utilize free or open-source software

Q15. In AWS, _____ is one of the advantages of Consolidated Billing.

A	Consolidation of both AWS and AISPL accounts into one billing.
B	Volume pricing. ✓
C	Go global in minutes.
D	The ability to have one member account to pay the charges of all the master accounts.

Q16. Which of the following AWS Global Infrastructure components is made up of one or more discrete data centers, each with redundant power, networking, and connectivity and housed in separate facilities?

A	AWS Region
B	Edge location
C	VPC
D	Availability Zone ✓

Q17. Which of the following cloud best practices reinforces the use of the Service-Oriented Architecture (SOA) design principle?

A	Design for failure.
B	Decouple your components. ✓
C	Think parallel.
D	Implement elasticity.

Q18. _____ lets you provision a logically isolated section of the AWS Cloud where you can launch AWS resources in a virtual network that you define.

A	Virtual Private Gateway
B	Amazon WorkSpaces
C	Amazon VPC ✓
D	Amazon Lightsail

Q19. Which among the following services or features can be used to test and troubleshoot IAM and resource-based policies, including those that grant access via AWS Security Token Service?

A	Amazon Inspector
B	AWS Systems Manager
C	AWS Config
D	AWS IAM Policy Simulator ✓

Q20. Among the following services, which is the most suitable one to use to store the results of I/O-intensive SQL database queries to improve application performance?

A	Amazon ElastiCache ✓
B	Amazon DynamoDB Accelerator (DAX)
C	AWS Greengrass
D	AWS IoT Greengrass

Q21. A company wants to launch a Microsoft SQL Server database in AWS. The database instance should only be managed by the company's DBA and must be accessible via RDP. A standard license for SQL Server is required but the company is not yet sure how much CPU and memory to allocate to the database. Which option gives the most convenience and flexibility to determine the best database size while still being cost-effective?

A	Launch an RDS instance that runs MS SQL Server Standard. Purchase a Standard MSSQL license and store it in the AWS Managed Services (AMS).
B	Launch an Amazon Aurora database that runs MS SQL Server. Buy a Standard MSSQL license from the AWS License Manager service.
C	Launch an EC2 instance and install MS SQL Server. Purchase a Standard MSSQL license from Microsoft and apply it to the database you installed.
D	Use a Windows Server with SQL Server Standard bundled AMI so you won't need to buy and manage your own license. ✓

Q22. Which of the following options below is solely the responsibility of the customer in accordance with the AWS shared responsibility model?

A	Patching of the host operating system
B	Configuration Management
C	Service and Communications Protection or Zone Security ✓
D	Awareness & Training

Q23. Which of the following allows you to set coverage targets and receive alerts when your utilization drops below the threshold you define?

A	AWS Cost Explorer
B	Amazon CloudWatch Billing Alarm
C	AWS Budgets ✓
D	AWS Trusted Advisor

Q24. Which of the following is used to enable instances in the public subnet to connect to the public Internet?

A	NAT instance
B	Internet Gateway ✓

C	API Gateway
D	NAT Gateway

Q25. Which service would you use to speed up content delivery to your customers?

A	Amazon CloudWatch
B	Amazon CloudFront ✓
C	Amazon S3 Transfer Acceleration
D	AWS CloudTrail

Q26. A company plans to migrate their on-premises MySQL database to Amazon RDS. Which AWS service should they use for this task?

A	AWS Schema Conversion Tool (AWS SCT)
B	AWS Database Migration Service (AWS DMS) ✓
C	AWS Application Migration Service
D	AWS Glue

Q27. Which is a machine learning-powered security service that discovers, classifies, and protects sensitive data such as personally identifiable information (PII) or intellectual property, and can send its findings to Amazon OpenSearch Service for further analysis?

A	Amazon Cognito
B	Amazon GuardDuty
C	Amazon Rekognition
D	Amazon Macie ✓

Q28. Which service allows the addition of powerful visual analysis features to applications, enabling the search, verification, and organization of millions of images?

A	Amazon Rekognition ✓
B	Amazon SageMaker AI
C	Amazon OpenSearch Service
D	Amazon Macie

Q29. Which of the following tasks fall under the sole responsibility of AWS based on the shared responsibility model?

A	Implementing IAM policies
B	Patch Management

C	Applying Amazon S3 bucket policies
D	Physical and environmental controls ✓

Q30. A customer has a number of on-demand instances running simultaneously to serve customer transactions. Occasionally, most of these instances do not perform any tasks when demand is low. What is a good cost optimization strategy to implement for this case?

A	Implement an auto scaling group to control the number of running instances at a time ✓
B	Scale up the instances to a higher instance type to reduce the number of running instances at a time
C	Use spot instances instead of on-demand instances
D	Create a script that would automatically shut down an instance when utilization is low

Q31. A company is planning to launch a new system on AWS, but it does not have an employee with AWS expertise. Which of the following AWS channels can instead help the company design, architect, build, migrate, and manage its workloads and applications on AWS?

A	AWS Partner Network (APN) Technology Partners
B	AWS Marketplace
C	AWS Partner Network (APN) Consulting Partners ✓
D	Technical Account Management

Q32. A customer in North Virginia, USA, is doing some drone work and collecting environmental data, and already uses AWS Ground Station for satellite data ingest. Which of the following options allows easy access to terabytes of data storage for use in a space-constrained environment and allows data transfer to AWS?

A	AWS Transit Gateway
B	AWS Storage Gateway
C	AWS Direct Connect
D	AWS Snowcone ✓

Q33. Which of the following is the most cost-effective instance purchasing option for hosting an application which will run non-interruptible workloads for a period of three years?

A	Amazon EC2 Convertible Reserved Instances
B	Amazon EC2 On-Demand Instances
C	Amazon EC2 Standard Reserved Instances ✓
D	Amazon EC2 Spot Instances

Q34. A company has enlisted Agila Consulting Co. to design an AWS disaster recovery solution for its on-premises bare-metal servers and SQL databases. The solution should provide a rapid, efficient method to replicate

its current environment on AWS with minimal data loss in the event of a disaster. The company would like to keep track of the status of the replication process. Which tool should the team adopt for the DR solution?

A	AWS Migration Hub
B	AWS Elastic Disaster Recovery ✓
C	AWS Application Migration Service
D	Cloud Migration Factory on AWS
E	High Availability

Q35. Which of the following options is an AWS Cloud Adoption Framework (CAF) perspective specifically tailored to ensure your cloud investments expedite your digital transformation goals and business outcomes?

A	Business perspective ✓
B	People perspective
C	Governance perspective
D	Operations perspective

Q36. Which of the following is a threat detection service that continuously monitors for malicious activity and unauthorized behavior to protect AWS accounts and workloads, and can be connected to AWS Network Firewall to also block malicious traffic?

A	AWS WAF
B	AWS Shield
C	Amazon Macie
D	Amazon GuardDuty ✓

Q37. Which of the following Cost Management Tools allows tracking of Amazon EC2 Reserved Instance (RI) usage and provides visibility into the discounted RI rate charged to resources?

A	AWS Budgets
B	AWS Cost and Usage report ✓
C	AWS Price List Bulk API
D	AWS Cost Explorer

Q38. Which of the following is best suited for load balancing Transmission Control Protocol (TCP), User Datagram Protocol (UDP), and Transport Layer Security (TLS) traffic and has the capability of handling millions of requests per second while maintaining ultra-low latencies?

A	Application Load Balancer
B	Network Load Balancer ✓
C	None of the above

D	Gateway Load Balancer
----------	-----------------------

Q39. Which of the following is the most cost-effective payment option when you purchase either a Standard or Convertible Reserved Instance for a 1-year term?

A	Partial Upfront
B	No Upfront
C	All Upfront ✓
D	Deferred

Q40. In compliance with the Sarbanes-Oxley Act (SOX) federal law, a US-based company is required to provide SOC 1 and SOC 2 reports of its cloud resources. Where are these AWS compliance documents located?

A	AWS Artifact ✓
B	AWS Audit Manager
C	AWS GovCloud
D	AWS Certificate Manager

Q41. Which AWS service allows Amazon EC2 compute capacity to automatically scale based on the incoming traffic, and can launch instances backed by On-Demand Capacity Reservations?

A	AWS Auto Scaling ✓
B	Amazon Macie
C	Amazon Lightsail
D	AWS CloudTrail

Q42. Which Amazon EC2 instance purchasing option allows you to take advantage of unused EC2 capacity in the AWS Cloud and provides up to a 90% discount compared to On-Demand prices?

A	Standard Reserved Instance
B	Convertible Reserved Instance
C	Dedicated Host
D	Spot Instance ✓

Q43. Which of the following is the benefit of using Amazon Relational Database Service (Amazon RDS) over traditional database management?

A	It is five times faster than standard MySQL databases and three times faster than standard PostgreSQL databases
B	Lower administrative burden through automatic software patching and maintenance of the underlying operating system ✓

C	Automatically apply both client-side and server-side encryption to your data by default
D	Automatically scales up the instance type of your RDS cluster based on demand

Q44. Which of the following is a fully managed database in AWS that can be used to store JSON documents?

A	Amazon Redshift
B	Amazon Aurora
C	Amazon DynamoDB ✓
D	Amazon ElastiCache

Q45. Which AWS Billing and Cost Management tool allows the forecasting of future costs and usage of AWS resources based on past consumption?

A	AWS Pricing Calculator
B	AWS Cost and Usage report
C	AWS Cost Explorer ✓
D	AWS Budgets

Q46. Which of the following is a key financial benefit of migrating systems hosted on your on-premises data center to AWS?

A	Opportunity to replace upfront capital expenses (CAPEX) with low variable costs. ✓
B	Opportunity to replace upfront operational expenses (OPEX) with low variable operational expenses (OPEX).
C	Opportunity to replace variable capital expenses (CAPEX) with low upfront costs.
D	Opportunity to replace variable operational expenses (OPEX) with low upfront capital expenses (CAPEX).

Q47. A company is using Amazon S3 to store their static media contents such as photos and videos. Which of the following should you use to provide specific users access to the bucket?

A	Security Group
B	Bucket Policy ✓
C	Web application firewall
D	Network Access Control List

Q48. Which of the following Amazon EC2 instance purchasing options can help you address compliance requirements and reduce costs by allowing you to use your existing server-bound software licenses?

A	On-Demand Instance
----------	--------------------

B	Reserved Instance
C	Dedicated Host ✓
D	Dedicated Instance

Q49. A space agency is using Amazon S3 to store their high-resolution satellite images and videos everyday. Which of the following should they do to minimize the upload time?

A	Upload the images and videos using the BatchWriteItem API
B	Use the Multipart upload API ✓
C	Shift to S3 Intelligent-Tiering storage class
D	Enable Cross-Origin Resource Sharing (CORS)

Q50. Which of the following should be used to automatically transfer infrequently accessed data in an Amazon S3 bucket to a more cost-effective storage class, such as S3 Glacier Instant Retrieval?

A	AWS Storage Gateway
B	S3 access control list
C	AWS Transfer Family
D	S3 Lifecycle Policy ✓

Q51. Which AWS service is commonly used for streaming data in real-time?

A	Amazon EMR
B	AWS Glue
C	Amazon Kinesis ✓
D	Amazon OpenSearch Service

Q52. There is an incident with your team where an S3 object was deleted using an account without the owner's knowledge. What can be done to prevent unauthorized deletion of your S3 objects?

A	Configure MFA delete on the S3 bucket. ✓
B	Create access control policies so that only you can perform S3-related actions
C	Set your S3 buckets to private so that objects are not publicly readable/writable
D	Set up stricter IAM policies that will prevent users from deleting S3 objects

Q53. Which of the following channels shares a collection of offerings to help you achieve specific business outcomes related to enterprise cloud adoption through paid engagements in several specialty practice areas?

A	AWS Professional Services ✓
----------	------------------------------------

B	Concierge Support
C	AWS Technical Account Manager
D	AWS Enterprise Support

Q54. Which of the following provides the most granular data about AWS costs and usage and can also load that information into Amazon Athena, Amazon Redshift, Amazon QuickSight, or a preferred tool, and also leveraged by AWS Billing Conductor for billing-group-level reporting?

A	AWS Budgets
B	AWS Cost and Usage Reports ✓
C	Consolidated Billing
D	AWS Cost Explorer

Q55. A company is using multiple AWS services to host its application. It wants to ensure the environment is optimized by adhering to AWS best practices. Which of the following services is capable of inspecting an AWS environment and making recommendations to lower expenditures, improve system performance and reliability, and close security gaps?

A	Amazon Inspector
B	AWS Trusted Advisor ✓
C	AWS Budgets
D	AWS Cost Explorer

Q56. Which statement below is correct regarding the components of the AWS Global Infrastructure?

A	An edge location contains multiple AWS Regions.
B	An AWS Region contains multiple Availability Zones. ✓
C	An Availability Zone contains multiple AWS Regions.
D	An Availability Zone contains edge locations.

Q57. You need to launch a new EC2 Instance for a beta program which is scheduled to change its instance family, operating system and tenancy exactly 3 months after its trial period. Which type of Reserved Instance (RI) should you use?

A	Scheduled RI
B	Zonal RI
C	Standard RI
D	Convertible RI ✓

Q58. Which Elastic Load Balancer can support path-based routing, host-based routing, and bi-directional communication channels using WebSockets?

A	Application Load Balancer ✓
B	Both the Application Load Balancer and Network Load Balancer
C	Network Load Balancer
D	Gateway Load Balancer

Q59. A leading company wants to ensure that its cloud services are consistently delivered at the agreed-upon level of its business stakeholders. The company is considering using the AWS Cloud Adoption Framework (AWS CAF) to guide its cloud operations. Which capabilities within the AWS CAF's Operations perspective would be most helpful for the company?

A	Identity and Access Management
B	Performance and Capacity Management ✓
C	Application portfolio management
D	Amazon Personalize

Q60. Which of the following is typically used to secure Amazon VPC subnets?

A	AWS IAM
B	AWS Config
C	Security Group
D	Network ACL ✓

Q61. When an existing Amazon Managed Streaming for Apache Kafka cluster is not required, which AWS service enables building event-driven applications and decouples application architecture components?

A	Amazon SQS
B	Amazon EventBridge ✓
C	Amazon SNS
D	Amazon Kinesis

Q62. Which AWS service provides access to compliance-related documents, such as ISO certifications, Payment Card Industry (PCI) reports, and Service Organization Control (SOC) reports, for security audits?

A	AWS Trusted Advisor
B	AWS Security Token Service
C	AWS Artifact ✓
D	AWS Certificate Manager

Q63. A new AWS customer needs to deploy up to 100 t3a.large Amazon EC2 instances on a recently launched Amazon VPC, which is way beyond the default service limit. What should be done to launch the additional instances?

A	Use AWS Trusted Advisor to increase the default service limits for EC2 instances.
B	Do nothing. You can directly launch 100 t3a.large EC2 instances at the same time since AWS will automatically increase your service limit for you.
C	Enable Enhanced Networking.
D	Create a case in the AWS Support Center page and request a service limit increase. ✓

Q64. Which of the following best describes what Amazon CloudWatch can be used for?

A	An automated security assessment service
B	A repository for compliance rules
C	A repository for metrics and logs ✓
D	An audit service that records all API calls made in your AWS account

Q65. Which of the following is true regarding Elastic Load Balancing?

A	It distributes incoming application traffic across multiple targets, such as Amazon EC2 instances, in multiple Availability Zones. ✓
B	It automatically increases or decreases the number of instances as the demand of your application changes.
C	It translates domain names (such as www.tutorialsdojo.com) into numeric IP addresses (such as 192.0.2.1) that Amazon EC2 instances use to connect to each other.
D	It is a virtual server that allows you to run your applications in the AWS Cloud.
